Muhamad Wijayanto

Backend Engineer

Email: work@yantology.dev | Phone: +6285804155315 | Location: East Java | Website: https://www.yantology.dev/ | LinkedIn: https://linkedin.com/in/muhamad-wijayanto

Summary

I'm a junior backend developer with a solid grasp of Golang and Python, focused on building scalable applications and RESTful APIs. I've honed my skills through freelance projects and collaborative work, ensuring I can effectively work with front-end teams and optimize performance. I'm always eager to dive into new technologies and contribute to projects that push the boundaries of development.

Experience

Freelance (Remote)

Fullstack Engineer

Jan 2025 - Present

Developed and maintained web applications for various clients. Designed and implemented RESTful APIs (Golang, Python) and frontend integration (TanStack Router). Utilized GCP (Cloud Run, Cloud Build) for development and CI/CD.

Sehari Jadi (East Java, Indonesia)

Wordpress Developer

August 2022 - December 2022

Developed and maintained WordPress websites for Marketing

Telkom Indonesia (Banddung, West Java)

React Native Engineer

Feb 2022 - Jun 2022

Developed and maintained mobile applications for Android and iOS platforms in combination with CodeIgniter for backend. Transformed Figma designs into responsive React Native components. Used Azure for CI/CD.

Education

Bachelor of Information Systems - University of Jember

2019 - 2024 | Jember, East Java

GPA: 3.5/4.0

Learning about software engineering, data science, and machine learning.

Skills

Programming Languages

Python, JavaScript, Dart, Golang, SQL

Projects

Simple POS System

A simple point-of-sale system for small businesses.

Technologies: Golang, PostgreSQL, Cloud Run-GCP, Cloud Build-GCP, Terraform

Fullstack Realtime Chat Application

A realtime chat application using WebSocket

Technologies: Golang, Gorilla WebSocket
